WHO WINS A TIE?

- Compare the hand type first.
- Same type: the higher cards that make the hand win.
- Still level: the highest side card (kicker) wins.
- Suits never break a tie. Equal hands split the pot.
- Only five cards count.

OFTEN MIXED UP

- A flush beats a straight.
- A full house beats a flush.
- Three of a kind beats two pair.
- Ace is high or low in a straight (10-J-Q-K-A or A-2-3-4-5), never in the middle.

RULE OF 4 AND 2

Count your outs (cards that complete your hand).

- On the flop: outs × 4 = rough % to hit by the river.
- On the turn: outs × 2.
- Flush draw 9 outs, open-ended straight draw 8, gutshot 4.

*Chance your best five of seven cards is this hand if you play to the river.
